# Controls and compliance checklist

To complete the controls assessment checklist, refer to the information provided in the scope, goals, and risk assessment report. For more details about each control, including the type and purpose, refer to the control categories document.

Then, select "yes" or "no" to answer the question: Does Botium Toys currently have this control in place?

### Controls assessment checklist

Yes	No	Control
	$\checkmark$	Least Privilege
	$\checkmark$	Disaster recovery plans
	$\checkmark$	Password policies
	$\checkmark$	Separation of duties
$\checkmark$		Firewall
	$\checkmark$	Intrusion detection system (IDS)
	$\checkmark$	Backups
$\checkmark$		Antivirus software
	$\checkmark$	Manual monitoring, maintenance, and intervention for legacy systems
	$\checkmark$	Encryption
	$\checkmark$	Password management system
$\checkmark$		Locks (offices, storefront, warehouse)
$\checkmark$		Closed-circuit television (CCTV) surveillance

<b>V</b>		Fire detection/prevention (fire alarm, sprinkler system, etc.)					
goals, and	l risk as	compliance checklist, refer to the information provided in the scope, sessment report. For more details about each compliance regulation, ols, frameworks, and compliance reading.					
Then, select "yes" or "no" to answer the question: Does Botium Toys currently adhere to this compliance best practice?							
Complian	ce che	ecklist					
Payment (	Card In	dustry Data Security Standard (PCI DSS)					
Yes	No	Best practice					
	$\checkmark$	Only authorized users have access to customers' credit card information.					
	$\checkmark$	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.					
	$\checkmark$	Implement data encryption procedures to better secure credit card transaction touchpoints and data.					
	$\checkmark$	Adopt secure password management policies.					
General Data Protection Regulation (GDPR)							
Yes	No	Best practice					
	$\checkmark$	E.U. customers' data is kept private/secured.					
<b>✓</b>		There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.					
	$\checkmark$	Ensure data is properly classified and inventoried.					

$\checkmark$	Enforce privacy policies, procedures, and processes to properly
	document and maintain data.

## System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
	$\checkmark$	User access policies are established.
	$\checkmark$	Sensitive data (PII/SPII) is confidential/private.
$\checkmark$		Data integrity ensures the data is consistent, complete, accurate, and has been validated.
	$\checkmark$	Data is available to individuals authorized to access it.

This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

**Recommendations (optional):** In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

#### Recommendations

## Implement Access Controls and Data Protection (Top Priority):

- Action: Implement access controls based on the principles of least privilege and separation of duties to ensure that employees only access data that is strictly necessary for their roles. This directly addresses the critical flaw that all employees can currently access internal data, and potentially customer PII/SPII and cardholder data.
- **Action:** Implement encryption to ensure the confidentiality of customer credit card information that is accepted, processed, transmitted, and stored.

 Justification: These actions are crucial for PCI DSS, GDPR, and SOC compliance and mitigate the high risk of fines and data breaches from not having necessary controls in place.

## **Establish Business Continuity (High Priority):**

- Action: Develop and implement disaster recovery plans and a policy for backing up critical data.
- **Justification:** The lack of these controls represents a significant risk to the business in the event of a security incident or system failure, as the company currently has no backups of critical data.

## **Strengthen Security Policies and Tools (Medium Priority):**

- Action: Review and enforce a strong password policy that aligns with current minimum complexity requirements. Implement a centralized password management system to enforce this policy and reduce the IT department's workload from password reset requests.
- **Action:** Install and configure an Intrusion Detection System (IDS) to monitor network traffic for suspicious activity.
- **Action:** Establish a regular schedule and clear intervention methods for monitoring and maintaining legacy systems.
- **Justification:** These steps will strengthen the company's defenses against common attacks, improve operational efficiency, and ensure that vulnerable systems are managed properly.
